<b>Context of the Foundation Report</b>	xiii
<b>Abbreviations and acronyms</b>	xiv
<b>Acknowledgments</b>	xvi
<b>About this report</b>	xvi
<b>Executive Summary</b>	xvii
<b>1 Introduction</b>	1
1.1 Purpose and content of this Foundation Report	1
1.2 Ministerial Council First Step Decision, November 2003	1
1.3 Background to the First Step Decision	3
1.4 Initial focus on the six SEAs	3
1.5 Objectives and expected outcomes of the First Step Decision	6
1.6 The health of the River Murray System	8
1.7 The types of opportunities available to achieve outcomes for the six SEAs	9
<b>2 Information base for the Barmah–Millewa Forest</b>	11
2.1 Introduction	11
2.2 Value and condition of Barmah–Millewa Forest	13
2.2.1 Conservation significance	13
2.2.2 Hydrology and geomorphology of Barmah–Millewa Forest	13
2.2.3 Floodplain vegetation distribution and hydrological regime	15
2.2.4 Health of floodplain vegetation	22
2.2.5 Colonially nesting waterbirds	26
2.2.6 Fish in the Barmah–Millewa Forest and adjacent river reaches	27
2.2.7 Macroinvertebrates in the Barmah–Millewa Forest and adjacent river reaches	28
2.2.8 In-stream habitat in river reaches containing to the Barmah–Millewa Forest	28
2.2.9 River channel and floodplain geomorphology	28
2.2.10 Water quality in river reaches adjacent to the Barmah–Millewa Forest	29
2.2.11 Human use values	30
2.2.12 Summary of knowledge of the condition of Barmah–Millewa Forest	31
2.3 Factors impacting in environmental values	33
2.3.1 Hydrology—degree of change to flows due to river regulation	33
2.3.2 Factors acting in combination to affect the health of the forest	35
2.4 Opportunities to meet ecological objectives for this site	36
2.4.1 Introduction	36
2.4.2 Increasing the frequency and duration of medium-sized spring flooding	36
2.4.3 Reducing the effects of unseasonal ‘rain rejection’ flooding in summer and autumn by structural and operational works	40
2.4.4 Habitat improvement and enhanced Murray cod survival	41
2.4.5 Links between ecological objectives and management opportunities	41
2.5 Observed environmental response to use of the Barmah–Millewa EWA	42

---

<b>3 Information base for the Gunbower and Koondrook–Perricoota forests</b>	45
<b>3.1 Introduction</b>	45
<b>3.2 Value and condition of Gunbower and Koondrook–Perricoota forests</b>	48
3.2.1 Conservation significance	48
3.2.2 Hydrology and geomorphology of Gunbower and Koondrook–Perricoota forests	49
3.2.3 Forest vegetation distribution and hydrological regime	56
3.2.4 Health of watercourses and wetlands	66
3.2.5 Colonial nesting waterbirds	67
3.2.6 Human use values	70
3.2.7 Summary of knowledge of the condition of Gunbower and Koondrook–Perricoota forests	71
<b>3.3 Factors causing loss in environmental values</b>	72
3.3.1 Hydrology—degree of change to flows due to river regulation	72
3.3.2 Other factors	76
<b>3.4 Opportunities to meet objectives for this site</b>	77
3.4.1 Introduction	77
3.4.2 Gunbower Forest—Structural and operational options	77
3.4.3 Koondrook–Perricoota Forest—structural and operational options	81
3.4.4 Links between ecological objectives for Gunbower and Koondrook–Perricoota forests and management opportunities	82
<b>4 Information base for the Hattah Lakes</b>	83
<b>4.1 Introduction</b>	83
<b>4.2 Value and condition of Hattah Lakes</b>	84
4.2.1 Conservation significance	84
4.2.2 Hydrology of Hattah Lakes	88
4.2.3 Vegetation distribution and hydrological regime	96
4.2.4 Birds	102
4.2.5 Fish	102
4.2.6 Macroinvertebrates	103
4.2.7 Frogs	104
4.2.8 Water quality and algal blooms	104
4.2.9 Human use values	104
4.2.10 Summary of knowledge of the condition of Hattah Lakes	107
<b>4.3 Factors causing loss in environmental values</b>	108
4.3.1 Hydrology	108
4.3.2 Other factors	117
<b>4.4 Opportunities to meet objectives for this site</b>	119
4.4.1 Introduction	119
4.4.2 Use of environmental water	119
4.4.3 Structural and operational measures	120
4.4.4 Links between ecological objectives and management opportunities	121

<b>5 Information base for the Chowilla Floodplain and Lindsay–Wallpolla Islands system</b>	123
<b>5.1 Introduction</b>	123
<b>Part A—Chowilla Floodplain</b>	129
<b>5.2 Value and condition of Chowilla Floodplain</b>	129
5.2.1 Conservation significance of Chowilla Floodplain	129
5.2.2 Geomorphology and hydrology of Chowilla Floodplain	132
5.2.3 Vegetation classifications used at Chowilla Floodplain	135
5.2.4 Floodplain vegetation distribution and hydrological regime	136
5.2.5 Health of floodplain vegetation	141
5.2.6 Birds	144
5.2.7 Mammals	145
5.2.8 Reptiles and amphibians	145
5.2.9 Fish	145
5.2.10 Macroinvertebrates	146
5.2.11 Aquatic macrophytes	147
5.2.12 Permanent and Semi-permanent Wetlands, including anabranch creeks	147
5.2.13 Geomorphology of River Murray channel in the zone containing Chowilla Floodplain	148
5.2.14 River salinity	149
5.2.15 Human use values	149
5.2.16 Summary of knowledge of the condition of Chowilla Floodplain	151
<b>5.3 Factors impacting on environmental values of Chowilla Floodplain</b>	153
5.3.1 Degree of change to flows due to river regulation	153
5.3.2 Influence of weirs	157
5.3.3 Salinity and Groundwater	158
5.3.4 Other factors	158
<b>5.4 Opportunities to meet objectives for this site—Chowilla Floodplain</b>	159
5.4.1 Introduction	159
5.4.2 Integrated catchment and salinity management	159
5.4.3 Enhancement of natural floods to increase their peak or duration using water releases from storages	159
5.4.4 Complementary structural and operational measures	161
5.4.5 Links between ecological objectives and management opportunities—Chowilla Floodplain	165
<b>5.5 Examples of implementation of environmental flows</b>	166
5.5.1 Experimental watering of River red gums on the Monoman Island Horseshoe, Chowilla Floodplain	166
5.5.2 Flood peak enhancement, combined with weir raising at Lock 5 (located downstream of Chowilla Floodplain)	168

<b>Part B — Lindsay–Wallpolla Islands</b>	175
<b>5.6 Value and condition of Lindsay–Wallpolla Islands</b>	175
5.6.1 Conservation significance of Lindsay–Wallpolla Islands	175
5.6.2 Regional hydrology, and flow paths within Lindsay–Wallpolla Islands	176
5.6.3 Flow thresholds and flow capacity for Lindsay–Wallpolla Islands and Lake Wallawalla	178
5.6.4 Vegetation distribution at Lindsay and Wallpolla Islands	186
5.6.5 Floodplain vegetation distribution and hydrological regime	189
5.6.6 Health of floodplain vegetation	192
5.6.7 Wetlands	193
5.6.8 Waterbirds	193
5.6.9 Fish	194
5.6.10 Salinity	196
5.6.11 Human use values	196
5.6.12 Summary of knowledge of the condition of Lindsay–Wallpolla Islands	197
<b>5.7 Factors impacting on environmental values of Lindsay–Wallpolla Islands</b>	198
5.7.1 Degree of change to flows due to river regulation	198
5.7.2 Changes in the frequency and duration of flow events	204
5.7.3 Other factors	208
<b>5.8 Opportunities to meet objectives for this site—Lindsay–Wallpolla Islands</b>	209
5.8.1 Introduction	209
5.8.2 Use of environmental water	209
5.8.3 Structural and operational measures	209
5.8.4 Links between ecological objectives and management opportunities—Lindsay–Wallpolla Islands	211
<b>6 Information base for the Murray Mouth, Coorong, and Lower Lakes</b>	213
<b>6.1 Introduction</b>	213
<b>6.2 Value and condition of the Murray Mouth, Coorong, and Lower Lakes</b>	215
6.2.1 Conservation significance	215
6.2.2 Hydrological and geomorphological processes	216
6.2.3 Mouth closure	218
6.2.4 Waterbirds	220
6.2.5 Aquatic and riparian plant communities	221
6.2.6 Macroinvertebrates	222
6.2.7 Fish	222
6.2.8 Algal blooms and water quality	224
6.2.9 Human use values	224
6.2.10 Summary of knowledge of the condition of the Murray Mouth, Coorong, and Lower Lakes	225
<b>6.3 Factors impacting on environmental values</b>	226
6.3.1 Hydrology—degree of change to flows due to river regulation	226
6.3.2 Hydrological impact of the barrages	229

6.3.3	Impact of altered hydrology on risk of Mouth closure	229
6.3.4	Other factors	230
<b>6.4</b>	<b>Opportunities to meet objectives for this site</b>	<b>231</b>
6.4.1	Additional flows to reduce risk of Mouth closure	231
6.4.2	Potential for complementary operational and structural measures	232
6.4.3	Links between ecological objectives and management opportunities	233
<b>7</b>	<b>Information base for the River Murray Channel</b>	<b>235</b>
<b>7.1</b>	<b>Introduction</b>	<b>235</b>
<b>7.2</b>	<b>Value and condition of the River Murray Channel</b>	<b>235</b>
7.2.1	Physical description of the River Murray Channel	235
7.2.2	Flow management structures along the River Murray Channel	238
7.2.3	River operations	243
7.2.4	Change to hydrology due to river operations	248
7.2.5	Decline in ecological health	251
7.2.6	Water quality	257
7.2.7	Evidence of geomorphic change	260
7.2.8	Community values of the River Murray Channel	262
7.2.9	Summary of knowledge of the condition of the River Murray Channel	263
<b>7.3</b>	<b>Factors impacting on environmental values</b>	<b>264</b>
<b>7.4</b>	<b>Opportunities to meet objectives for this site</b>	<b>270</b>
7.4.1	Increase river flow	270
7.4.2	Structural and operational opportunities	271
7.4.3	Links between ecological objectives and management opportunities	273
7.4.4	Influence of weirs	274
<b>8</b>	<b>Links between the significant ecological assets</b>	<b>275</b>
<b>8.1</b>	<b>Introduction</b>	<b>275</b>
<b>8.2</b>	<b>Distinctive features of each asset</b>	<b>275</b>
<b>8.3</b>	<b>Rostering to maximise and share ecological benefits between assets</b>	<b>277</b>
<b>Appendix A: List of common names of flora and fauna used in the report with Latin equivalents</b>		<b>281</b>
<b>Glossary</b>		<b>285</b>
<b>References</b>		<b>295</b>
